With pool purchase.
$119.99
When purchased separately.

Available only on Atmosphere, Escalade, Oceanic, S, and Matrix models.
Special offer: FREE with selected in-stock Oceanic STR54 pools with Bloom walls only

Wallsaver Features

The Sharkline Wallsaver Panel System includes a special removable section of pool wall with a lifetime warranty. Traditionally, the area of pool wall around the thru-wall skimmer is the most likely area to corrode or be damaged by ice. In most pools, damage to this section can only be repaired by replacing the entire wall—or an entirely new pool.

If your separate Wallsaver panel is ever damaged, the panel will be replaced at no charge by Sharkline.

The special Wallsaver panel is triple coated with 18 coats of protective finish. The double stabilized joints are **ten times stronger** than the wall itself.

Wallsaver Warranty

If the Wallsaver panel ever fails to perform, it may be returned by the original purchaser, to Sharkline—with your original receipt and this warranty, for a full and free replacement. Failure to perform may be indicated by rusting through, but not surface rust—which is a part of annual pool maintenance. This warranty covers only the actual panel, and does not cover consequential, incidental, or other damages. Wall bolts are not included, but should be re-usable. Consumer negligence or abuse are not included. Also, due to changes in dye lots and probable fading of the original pool's finish over time, the replacement panel will perform as well as the original, but may not match the original in color. Other than that, it's free, for the life of the pool—period.
