Marquis Signature Special Order Hot Tubs

Marquis Signature Colors:

Select DuraCover:

Select DuraShell:

Select DuraWood:

The DuraWood exterior can weather the storm

DuraWood is a wood-grained exterior formed of UV resistant synthetic material. It resists water damage, scratches, dents, and retains its "like new" appearance longer than many available market alternatives. Available in several colors, it blends with any environment.

Marquis® DuraBase is a formed solid sheet of high-impact, textured ABS plastic that won't fail or need repainting over time. It provides solid support and protection for your entire spa base from nicks, dents, water damage, or pests.

DuraCover™ is tops

Because energy efficiency is important to the world, Marquis uses the best cover in the market. The DuraCover® is insulated with the finest certified two pound density foam. It also features an exclusive linear heat seal to prevent heat from escaping. Aside from energy-wise, the DuraCover® doesn't easily dent and holds 100 lbs. more weight than a standard cover. You'll especially appreciate its strength and safety rating if you have children and pets.

Beauty runs deep

Marquis' DuraShell® interior is an extremely durable Lucite® acrylic that stands up to the elements, resists cracking, fading and blistering. A splash guard coping keeps water spills to a minimum and organic styling makes the interior a one-of-a-kind work of art. Drink holders, interior safety lighting, and a convenient floor drain complete the interior. Marquis® is so easy to use it's easier to enjoy!

Marquis' contoured cushioned headrests are made of EVA and are impervious to the harsh spa environment so they will outlast standard pillows for years.
